Summary

Results-driven Computer Science student with practical experience in developing full-stack web applications using React, Node.js, and Express. Strong problem-solving skills backed by solid knowledge of data structures, algorithms, and database systems including MySQL and MongoDB. Adept at building secure, scalable solutions and continuously improving through hands-on projects and modern development practices.

Education

Chitkara University, Rajpura, Computer Science Engineering

Aug 2023 - Present

- CGPA: 7.30
- **Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering (Agile Methodology), Cloud Computing Basics, AWS Cloud Architecture

Skill Set

Programming Languages: Java, C++ , JavaScript, HTML, CSS

Frameworks & Libraries : React.js, Node.js, Express.js, Spring Boot, Tailwind CSS

Databases: MySQL, MongoDB

Developer Tools & Technologies: Git, GitHub, VS Code, Postman, Linux

Cloud Platforms: Amazon Web Services (AWS) — EC2, S3, RDS, Elastic Load Balancer, Auto Scaling, AMIs

Projects

Food Delivery Web Application – Full-Stack MERN Project

Live Demo

- Independently developed a full-stack food delivery web application enabling users to browse menus, add items to cart, and place orders seamlessly.
- Implemented secure JWT authentication with email-based OTP verification for user account security.
- Built RESTful APIs using Node.js and Express for users, orders, and delivery workflows.
- Designed and optimized MongoDB schemas for fast and scalable data storage.
- Implemented real-time order and delivery-boy tracking for live status updates.
- Developed a responsive React frontend with validations, smooth UI interactions, and deployed the application on Vercel.

Weather App – Real-Time Forecast Web Application

Live Demo

- Independently developed a responsive weather forecasting web application providing real-time temperature, humidity, and condition updates for cities worldwide.
- Integrated external weather APIs to fetch live data with dynamic UI updates based on user search and location input.
- Designed a clean, user-friendly interface and optimized state handling for smooth performance.
- Deployed the application on Vercel for fast and reliable global access.

Hackathons

AI and Innovation Hack Quest — 2nd Place

- Led frontend development using React and delivered a working prototype of UCampus within 24 hours.

BnB-Hackathon - Finalist

- Served as AI-object Detection and project demonstrated solution and pitched to judges.

Certifications

- Prompt Engineering & Programming with OpenAI — Columbia+(Steven Blomgren)
- Deloitte — Technology Job Simulation (Tina McCreery)
- Introductory C Programming — Coursera (Andrew D.Hilton)
